Call for student intern

The CRE Lab is looking for a UCSD student intern who is interested in biology/marine biology to help out with research projects in the lab. We are looking for someone who has prior experience and knowledge of working in a lab, specifically with culturing and working with bacteria and/or algae. This person should have general lab experience and knowledge of lab practice, microbiology, and/or molecular techniques (e.g., pipetting, lab cleanliness, microscope, working in a biological hood, etc.).

Not required, but a huge plus if you have any of the following:

- 1) Prior experience making agar plates and liquid media for bacteria cultivation.
- 2) Prior knowledge and experience with algae culture maintenance and media making.
- 3) Knowledge of autoclaving liquids and supplies.

Please reach out via email with your CV if you are interested to Dr. Daniel Wangpraseurt dwangpraseurt@ucsd.edu and Dr. Natalie Levy nrlevy@ucsd.edu.
